

Cara Join Domain

1. Setting IP dan DNS

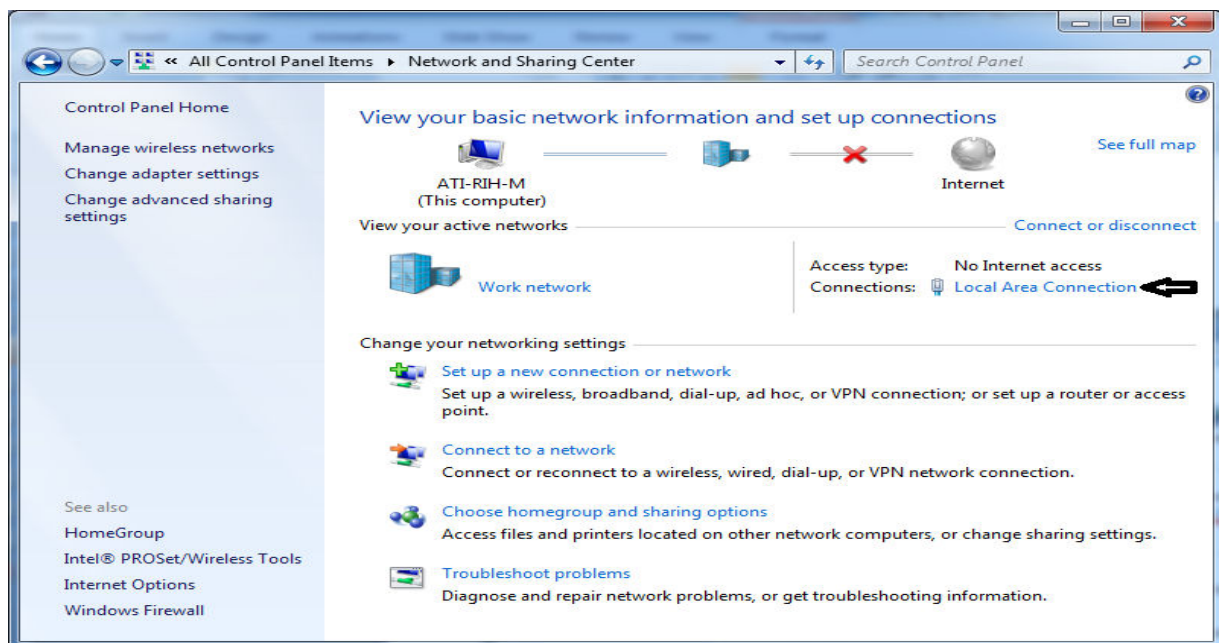

- Pertama adalah mencari setting Internet Protocol Version 4

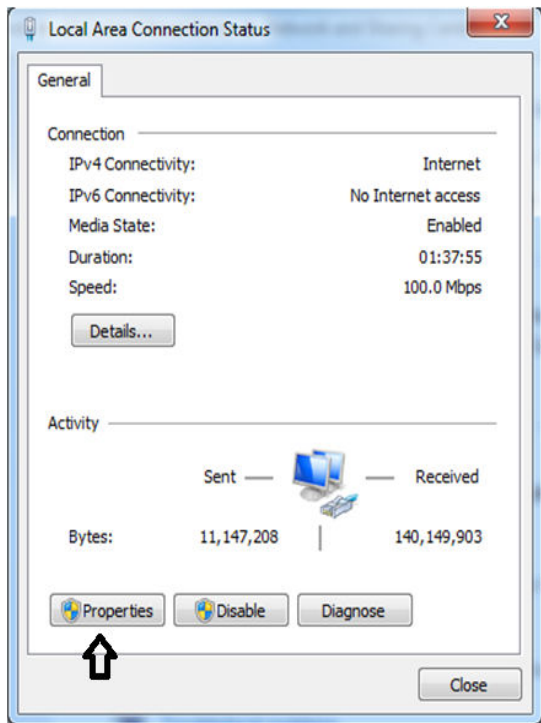

Klik windows lalu pilih Control panel

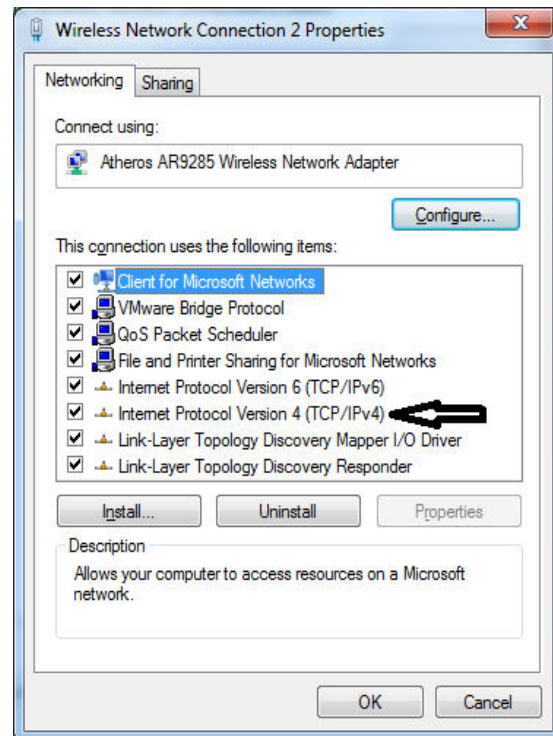

Pilih Network and Sharing Center

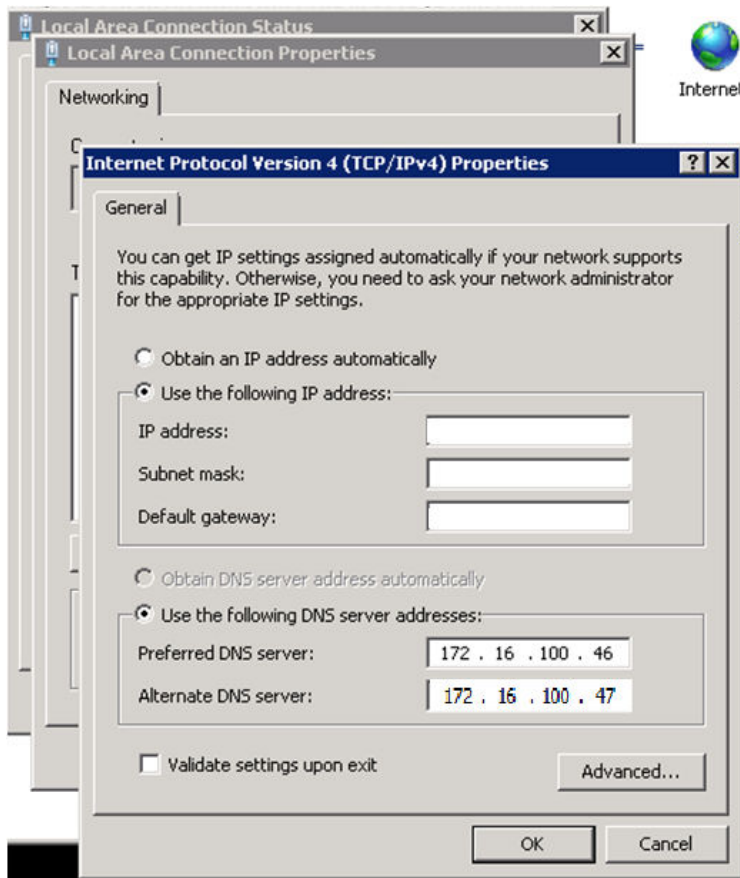

Setelah itu Klik Local Area Connection

Klik Properties

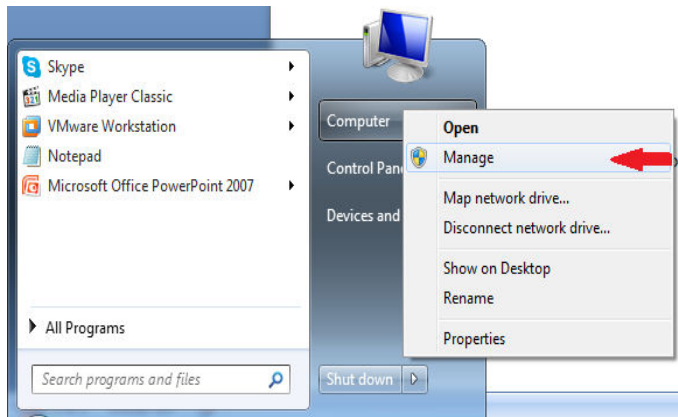

Lalu cari Internet Protocol Version 4 dan klik Properties

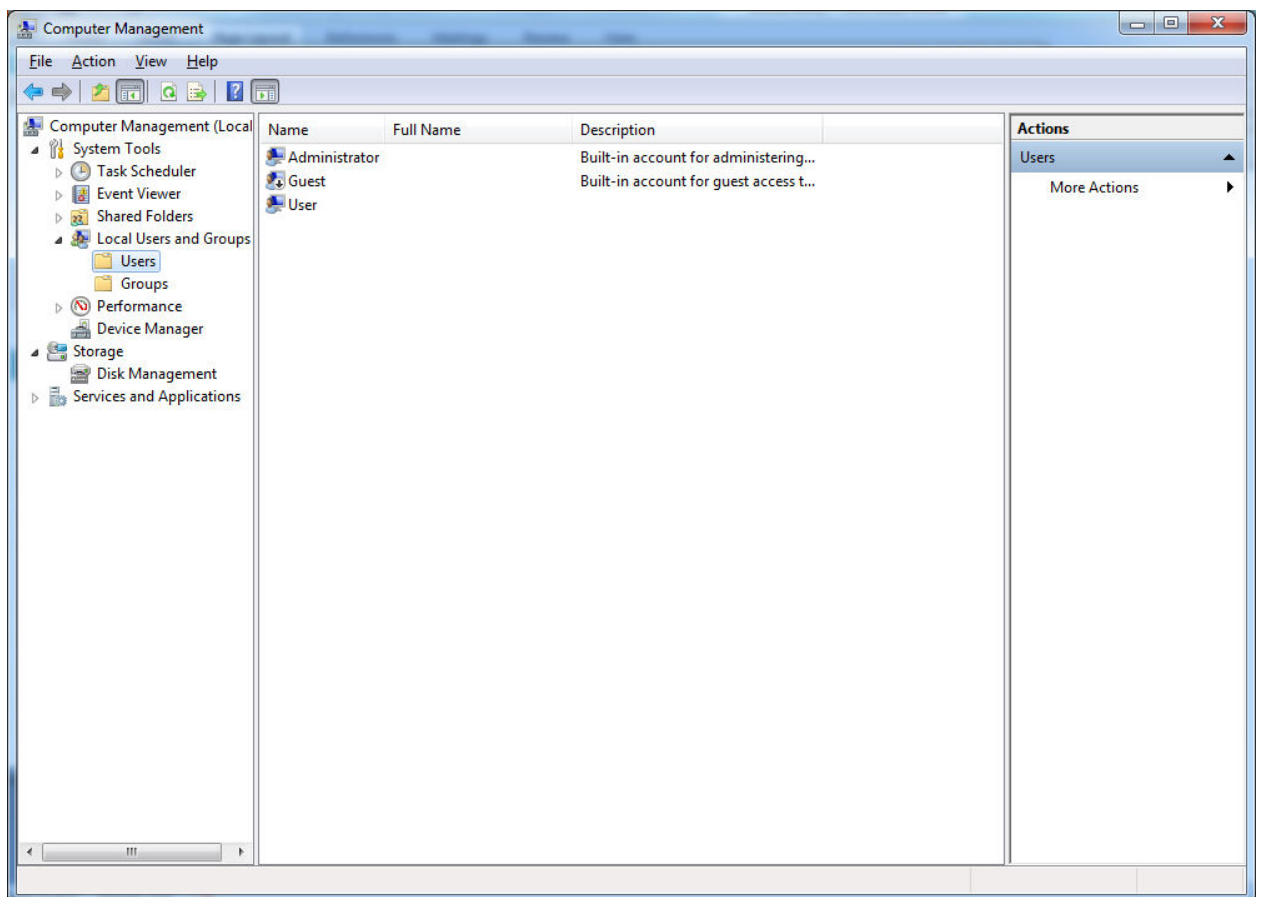

Lalu isi DNS dengan IP dari Active Directory yang baru

Untuk DNS yang perlu disetting di isi dengan IP AD yang baru yaitu : 172.16.100.46 & 172.16.100.47

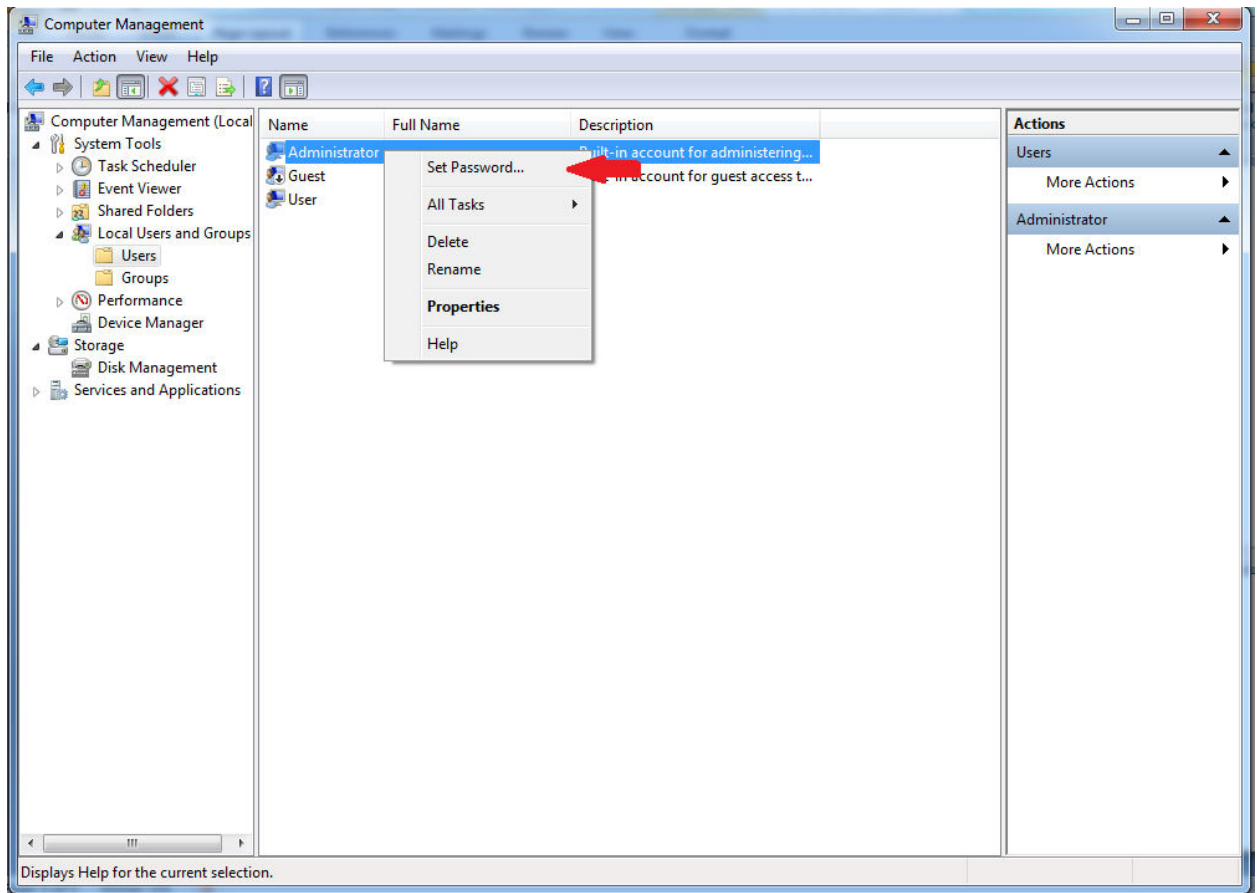

2. Reset Password Administrator local

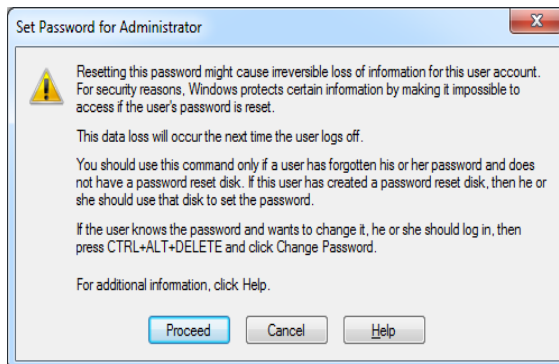

Klik kanan computer lalu pilih manage

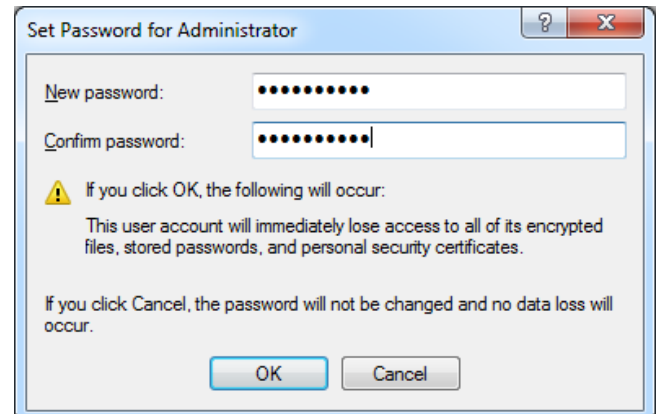

Klik Local Users and Group lalu pilih Users

Lalu Klik kanan pilih Set Password...

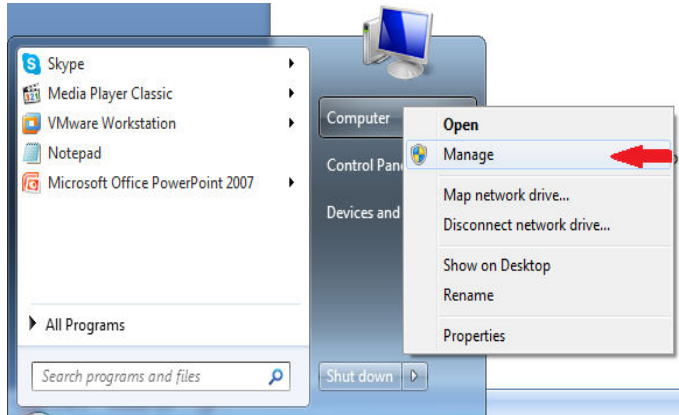

Klik Proceed

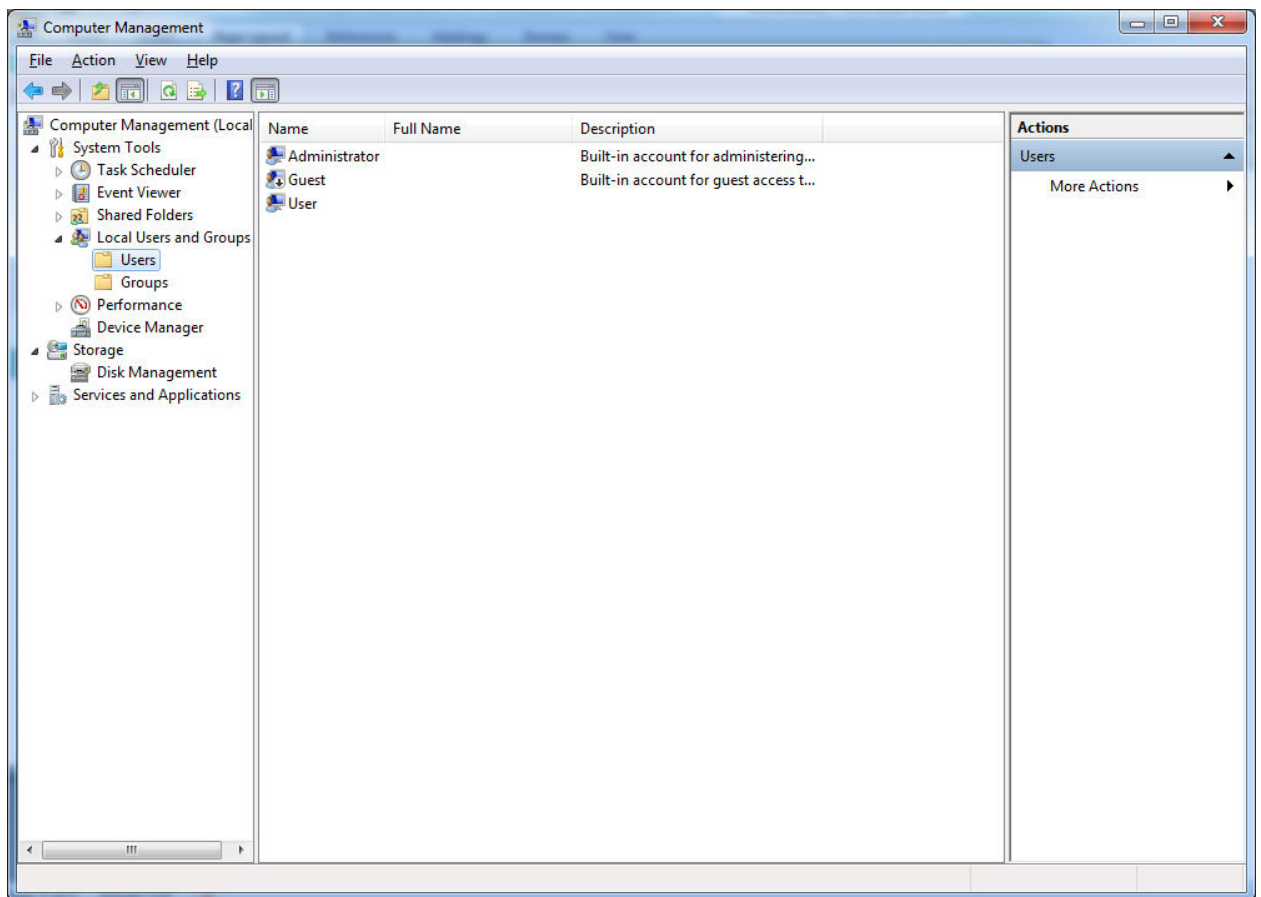

Input password baru lalu klik OK

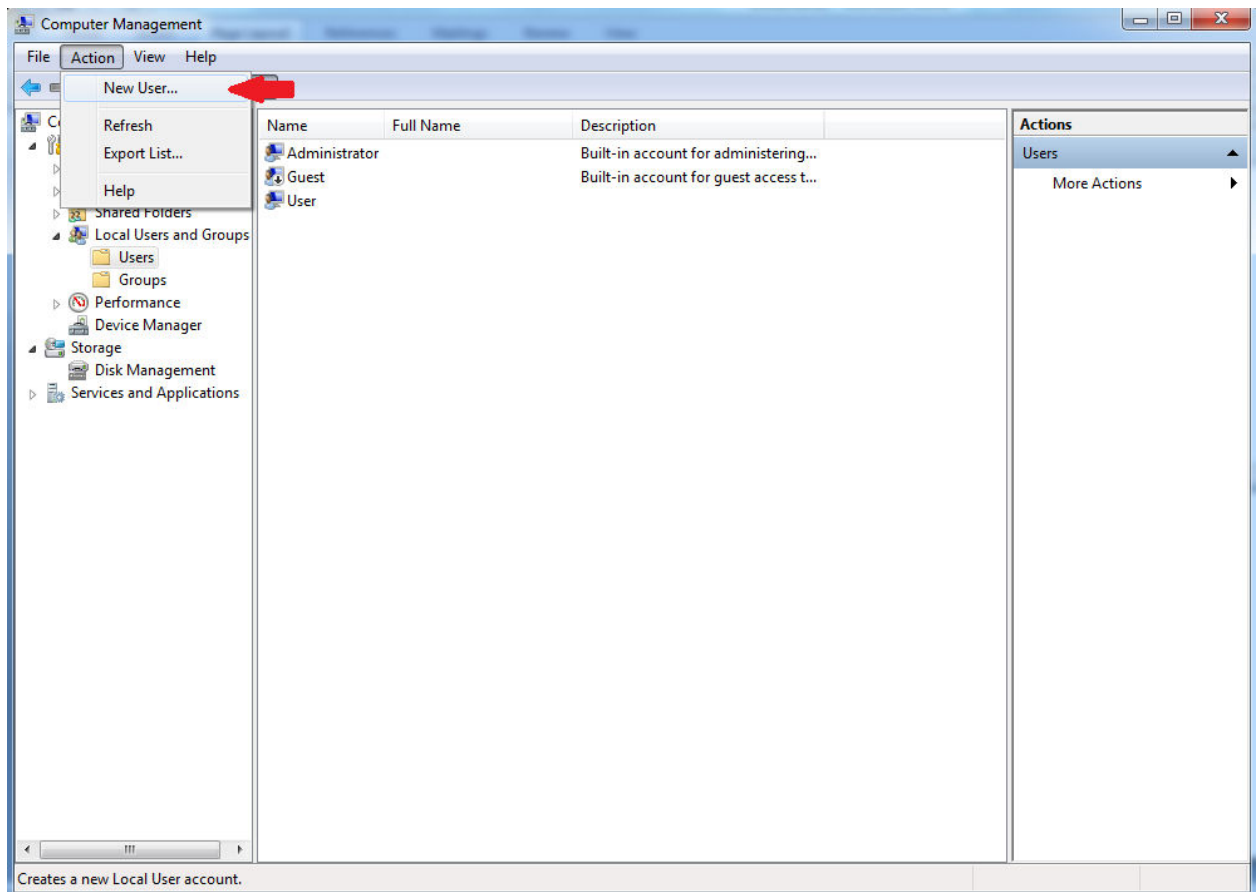

3. Create User yang Role sesuai dengan Administrator

Klik kanan computer lalu pilih manage

Klik Local Users and Group lalu pilih Users

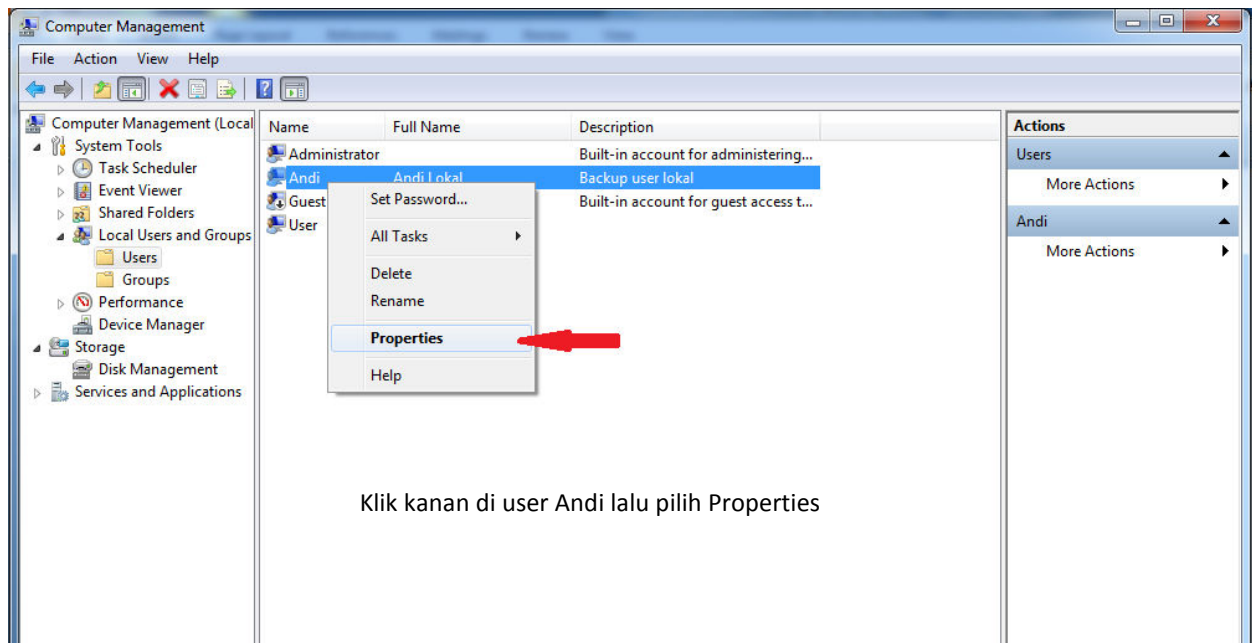

Pilih Action lalu klik New User...

The 'New User' dialog box is shown. It contains the following fields and options:

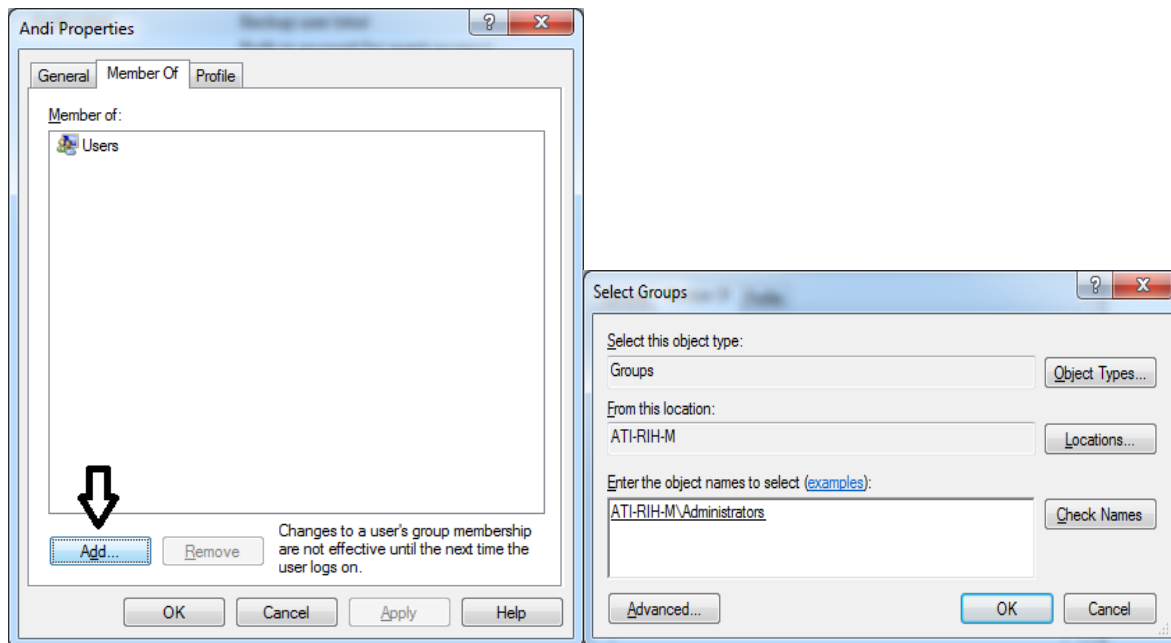

- User name: Andi
- Full name: Andi Lokal
- Description: Backup user lokal
- Password: (masked with dots)
- Confirm password: (masked with dots)
- ☐ User must change password at next logon
- ☐ User cannot change password
- ☒ Password never expires
- ☐ Account is disabled

Buttons at the bottom: Help, Create, Close.

Input username, full name dan password lalu klik Create

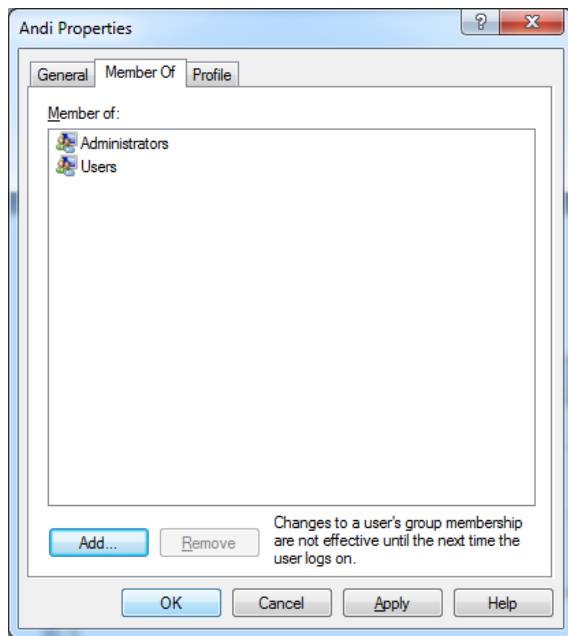

Klik kanan di user Andi lalu pilih Properties

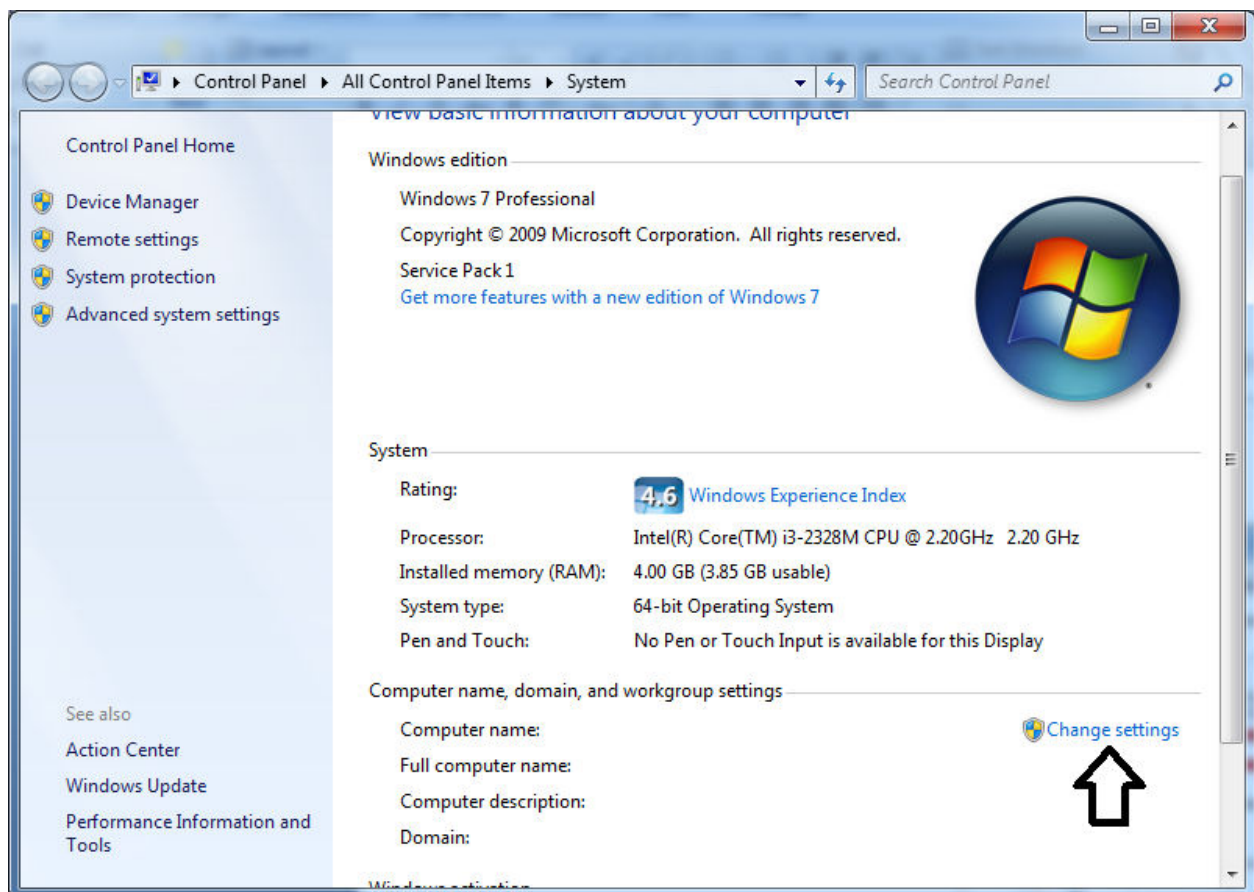

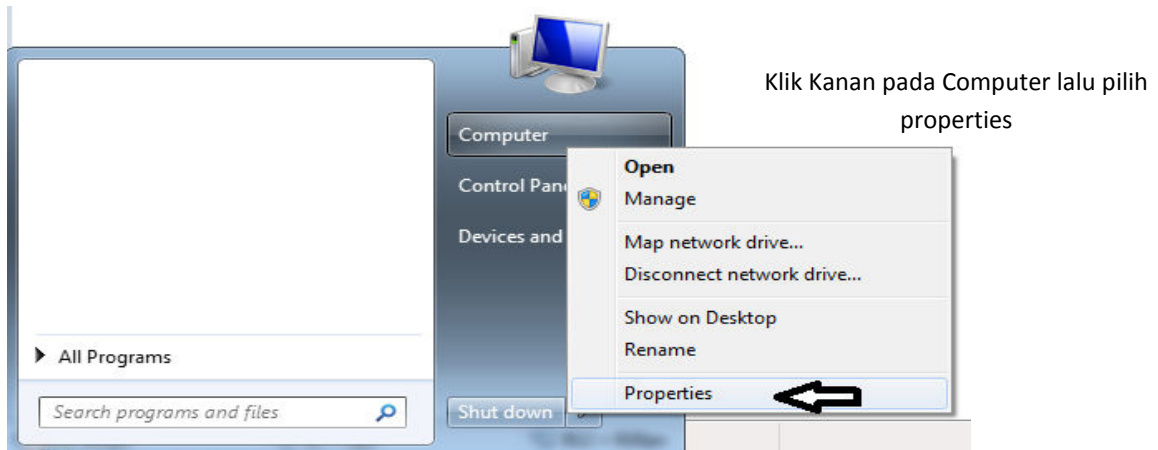

Pilih tab Member Of lalu klik add

Ketik administrator lalu klik check names.
Setelah itu klik OK

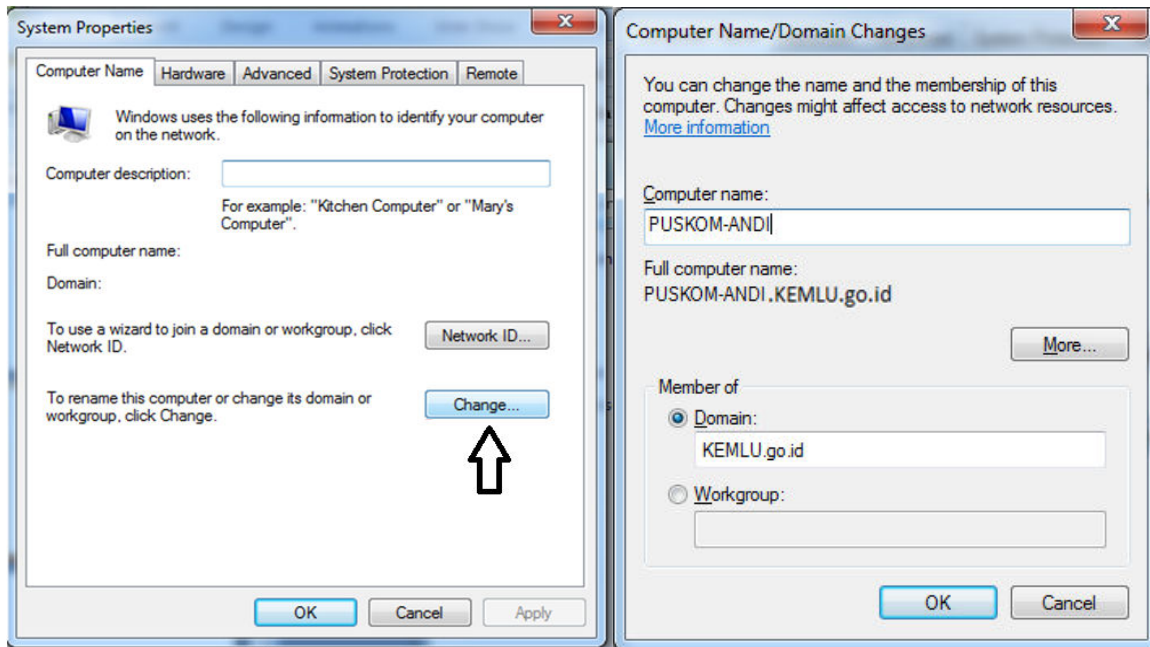

Setelah administrator sudah dalam group
klik OK

4. Ubah nama Komputer sesuai format perusahaan dan join domain seperti :
PUSKOM-ANDI
Caranya :

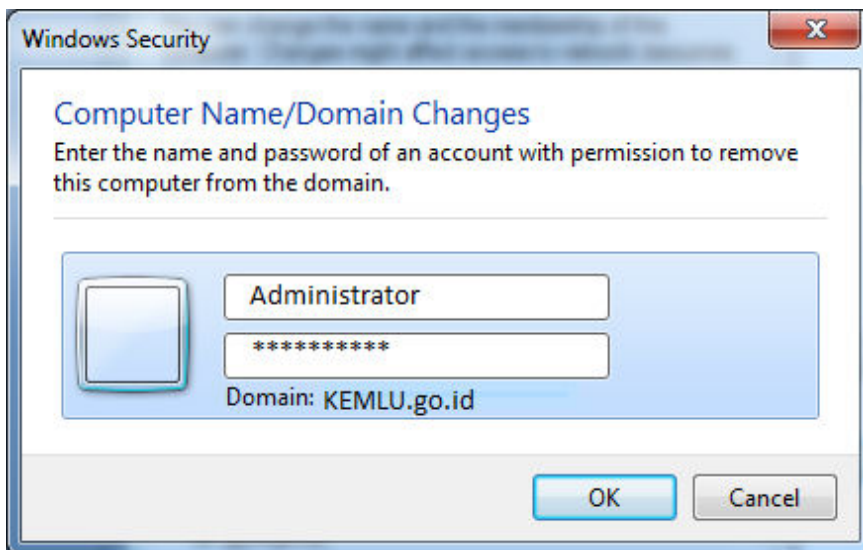

Pilih Change Settings

Klik button Change

Isi nama computer sesuai dengan format
dan input nama domain

Input administrator dan Password dari AD

Setelah klik OK, maka komputer perlu restart
